

EACH Child and Young Person's Health Matters: Who looks after those in care when they are ill?

Do your carers look after someone else's child either as a Foster, Respite or Kinship Carer?
Do they have any questions relating to the child's healthcare?

Our workshops are here to help!

'Very interesting day – will help me to take more time to understand the child. I need to think not what's wrong with you, but what happened to you?'

Carer's feedback after workshop sessions

Workshop topics

- Managing the healthcare needs and rights of children in care
- Mental health and wellbeing for children in care
- Consent and Confidentiality
- Dental, Medical and Hospital procedures using play to help children cope with treatment and pain
- Getting it right for Looked After Disabled Children and those with complex healthcare needs

We can also design bespoke training around your group's specific needs and interests.

Training arrangements

- **Where?** At your group's usual meeting place/carers centre
- **When?** At a time to suit your carers
- **How long?** Session lengths vary according to the topic
- **Costs?** Free of charge
